

Issue	Variable	Description	Recommendation
Missing Values	Income	Some customers have missing income values.	Fill using median income.
Incorrect Data Type	Dt_Customer	Stored as text instead of Date format.	Convert to datetime.
Inconsistent Categories	Marital_Status	Categories such as YOLO, Alone, Absurd increase category count.	Merge into standard categories.
Outliers	Income	Extremely high income values exist.	Detect using IQR and cap/remove if necessary.
Outliers	Product Spending	Very high spending values exist.	Treat using IQR or Winsorization.
Possible Invalid Ages	Year_Birth	Very old birth years may create unrealistic ages.	Validate and remove if incorrect.
Missing Standardization	Education	Education names have multiple formats.	Standardize category names.
Website Visits	NumWebVisitsMonth	Very high values may indicate unusual behavior.	Verify and inspect outliers.
